

LED PIR sensor

Our LED Light with PIR Sensor is the easy way to install automatic lighting with minimum fuss. A built in infra red sensor detects movement and the adjustable beam gives you the right light for any job.

- ✓ Stick it anywhere! For whenever and wherever you need a little light
- ✓ Motion sensor means that the light turns on whenever you're near. Inbuilt darkness sensor means that you don't waste battery power during daylight hours
- ✓ Put it next to the door for getting your keys into the lock, in the bathroom at night, by the bed, when camping, or in a cupboard or wardrobe
- ✓ Adjustable light beam can be angled wherever needed
- ✓ Tool free installation! No screws or wiring needed
- ✓ Uses 3 AA batteries, not included

Applications	:	Hallway lighting. Closet lighting and wherever you need a little light
Light source	:	High power LED
Power consumption	:	80 mA on steady light mode
Lamp base	:	NA
Weight	:	110 gram
Dimension	:	50 (h) 99 (d)
Beam angle	:	120 degrees
CRI	:	NA
Life span	:	With Duracell batteries 70 hours
Lumen	:	2000 MCD
Color temperature	:	White Light
Input voltage	:	3 x AA batteries
Working temperature	:	-20 to 50 degrees
Protection rate	:	IP20
Dimmable	:	No
Certificates	:	CE & ROHS
Additional information	:	Product made of ABS and PP plastics
Warranty	:	One year
